

Wild Guardian

*A road to save the
Wildlife Day*

The official whitepaper for the Decentralized Autonomous Organization that owns and controls the first ever Web 3.0 Zoo on All metaverse platforms - Our main goal is to bring awareness to the community about endangered species and make a passive income stream for our Holder.

Tokenizing a Metaverse Zoo:

Any vibrant project needs one thing and one thing only: a vibrant community.

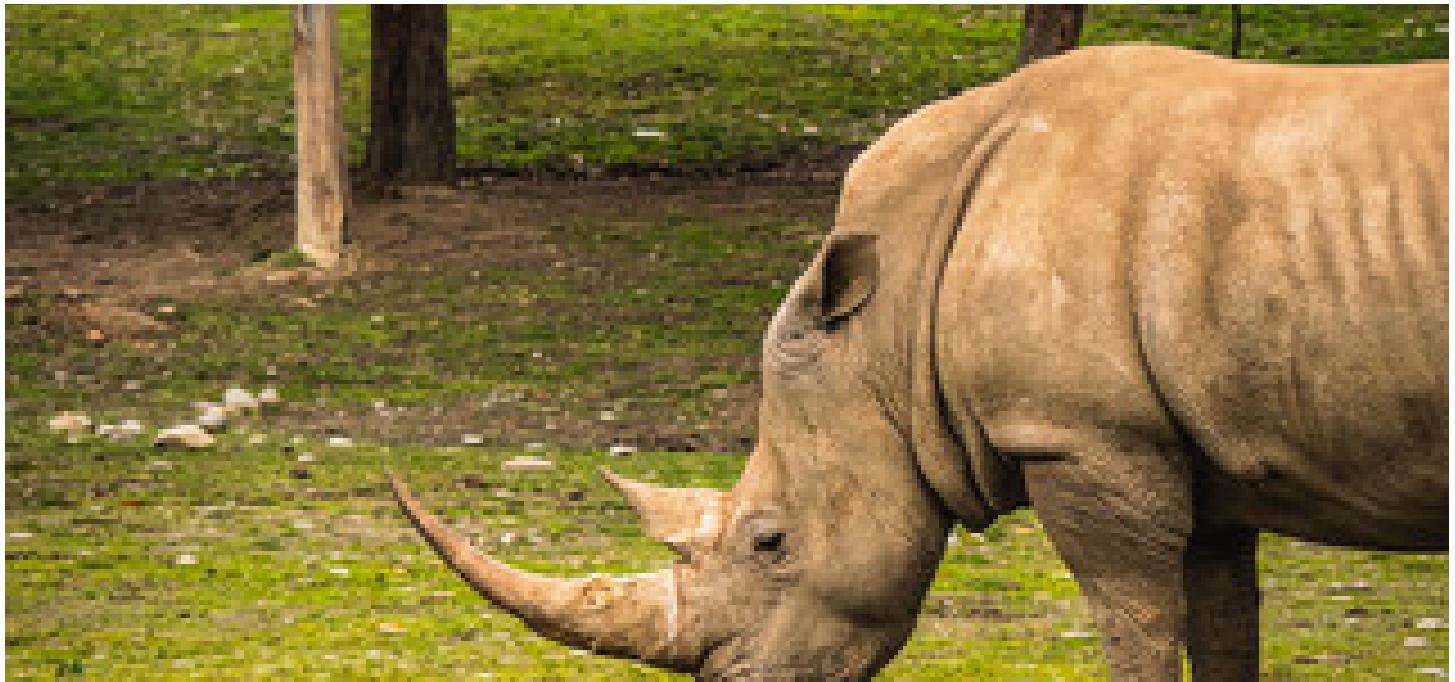

NFTs allow for both creating an exchangeable token that represents a valuable good - in this case, a gamified metaverse business - and to help build a community around a project by giving each participant a unique character (or set of characters) that they can identify with.

We enable anyone to invest in the metaverse industry with very little initial investment. By generating a community the business itself also grows as it gains more traction and attention that ultimately results in higher revenues for the community.

Generating wealth with Guardian:

Compared to other NFT projects whose funding and income only comes from the sale of tokens, our project main income stream for holder will be:

1. Ad/Inapp purchases revenue from games.
2. Secondary market sales.
3. Merchline returns. (Store)
4. Play to earn games.
5. Our own metaverse platform.

ONE DAO TO RULE THEM ALL

When the business is controlled and owned by the DAO, it will be in every participant's interest to make the business grow and prosper. To this end, from the thousands of individuals conforming the DAO, many will come forward along the way and offer support, networking and market access to a much larger extent than just a few individuals conforming a traditional business ever could.

Wild Guardian Zoo locations:

Originally we will only target the three most popular metaverse for now, & after successful development, the number will be doubled in order to meet a fast growing demand.

1. Sandbox
2. Decentraland
3. Somnium Space

Platform	Currency	USD(as on Jan 11, 2022)
Decentraland	\$MANA	2.8
The Sandbox	\$SAND	4.4
Somnium Space	\$CUBE	7.19

We will add more later but for now we will target these.

ANIMALS

We Selected 11 rare Animals for now, but in the first phase we will add at least 111 animals to our zoo and invite different organizations to visit it and have experience.

The list of 11 selected animals is below:

- Saola
- Gorillas
- Rhinos
- Sea turtles
- Whale
- Tooth-billed pigeon
- Gharial
- Kakapo
- Vaquita
- Markhor
- Amur Leopard

For more details about animals, join our discord

TEAM AND PARTNERS:

Founder: wiki
Community Manager: Nexxie
Content Writer: Shah
Developer: Moiz
Designer: NightFurry
DAO: will be decided by the community

We will update this list with time, you can check more about us on our Website.

TECHNOLOGY DRIVEN CULTURE:

In Wild Guardian Zoo, everything will be digitally gamified. Including our token! By embracing technology users will gain access to games and there they will earn tokens and will spend it in the zoo for entry.

Can users buy our model with our coins? No problem. With our digital system, we know exactly how we can sell out a model and users can keep it in their house in the metaverse . Customers want to pay in other crypto? Other coins are welcome! Not only have we grown our business by accepting crypto payments, we have also helped the space gain increased awareness and adoption.

Art and community:

Gaming is part of our culture, and so is Art.

By working with internationally recognized artists and other influencers we have given our spaces a unique look and feel -

Art comes in many forms. Musical bands and DJs have used rare animals to share their creations. Fantastic photographers have captured rare animals through their lenses to share with the world. We are adding gamified experience to it.

Our Community is our main focus and we want to bring value to our community. So we will focus on our roadmap to fulfill the expectation of our community.

NFT LAUNCH DATE & PLATFORM:

We will launch our collection on magic eden, the number of NFT will be 1111. The date is not yet finalized but we are looking forward to the first week of october 22, Although we are not in any sort of rush.

GAME LAUNCH:

We will launch 11 games around our theme on different platforms, the main will be:
Google play
Play store
Our own website

The revenue will be equally distributed among the holders.

FUTURE PLANS:

We will launch a merch line for wild guardians & an exclusive metaverse of our own
